Development of the Example Mood Scale

Example, A., & Sample, B. (2019). Journal of Demonstration Measures, 4(2), 101-115.

This article is fictional. It stands in for an instrument's original reference
so that the labcatalog example can show a PDF next to the citation.

Six items, answered on a four-point frequency scale (0 = Never to 3 = Always).
Items 1 and 4 are reverse scored. Subscales: Sadness, Worry and fatigue,
Low positive affect.
